

KELSON VINCEN

+62 859-2000-2027 | kelson.vincien@gmail.com | [LinkedIn](#) | [Portfolio](#)

Data Engineer with hands-on production experience building and scaling ETL/data pipelines and large-scale data migrations, with a foundation in SQL, PostgreSQL, and pipeline testing and validation.

EDUCATION

Bina Nusantara University (BINUS)

2023 – Present

Bachelor of Science in Computer Science | Tangerang, Indonesia | Expected Graduation: September 2027

- Cumulative GPA: 3.99 / 4.00
- Dean's List 2025, School of Computer Science
- Relevant Coursework: Database Systems, Big Data, Cloud Computing, Data Structures and Algorithms

PROFESSIONAL EXPERIENCE

Data Engineer Intern

Feb 2026 – Present

PT Cyberindo Aditama (CBN) — Technology Development Division | Jakarta, Indonesia

- Architected and executed a large-scale database migration for a national ISP, mapping production data from 14 distributed legacy SQL Server instances into a centralized PostgreSQL target schema with no existing Entity-Relationship Diagrams (ERDs).
- Engineered an automated migration pipeline that cut cross-branch migration timelines from over 8 weeks to under 2 weeks per module.
- Migrated 3.58M+ spatial coverage records and 20K+ product pricing rules using SQL-based transformation logic, enforcing data quality through a multi-layer validation suite (structural, volumetric, and semantic) alongside strict idempotency constraints and branch-code namespacing.
- Built, maintained, and monitored 4 production data pipelines (Apache NiFi) handling customer and product data, daily network traffic logs (CDN), Radius server usage data, and communication analytics across all 14 branches.
- Deployed GitLab version control for all NiFi pipelines, replacing deprecated standalone registries to enforce structured testing, staging, and production deployment workflows.

TECHNICAL SKILLS

- Languages:** SQL, Python, C++
- Databases:** PostgreSQL, SQL Server, MySQL
- Infrastructure & Pipelines:** Apache NiFi, Git, GitLab CI/CD
- Libraries & Tools:** psycopg2, QGIS

THESIS RESEARCH

Undergraduate Thesis — GIS-Based EV Charging Station Placement

2025 – Present

Bina Nusantara University | Supervisor: Dr. Ir. Edy Irwansyah, S.T., M.Si., IPM, ASEAN Eng.

- Built a GIS-based Maximal Covering Location Problem (MCLP) framework in Python to optimize EV charging placement, balancing user coverage against power grid efficiency; manuscript submitted to Discover Cities (Springer Nature), currently in editorial review.

ACADEMIC LEADERSHIP & MENTORING

Manager, IT Development Division

Feb 2025 – Feb 2026

Binus Student Learning Community

- Directed a 10-person engineering team in the technical architecture, development, and maintenance of university web platforms.

Computer Science Scholarship Mentor

Sep 2024 – Jan 2025

Bina Nusantara University

- Founded a 100+ student technical community and led review sessions in Database Technology, Algorithm Design, Artificial Intelligence, and Object-Oriented Programming.
